## SUMMARY

Software Engineer experienced in building backend services and full-stack web and mobile applications for early-stage products and to support real-world business workflows. Known for pragmatic engineering decisions, clear communication, and shipping functional products under tight constraints.

## EXPERIENCE

### Software Engineer (Full-Stack / Backend-Focused)

*Reelest Studios (Founder)*

Jun 2023 - Present

- Designed and built backend services, APIs, and data models supporting real-world business workflows.
- Developed frontend and mobile application features aligned with defined product requirements.
- Delivered MVPs and early-stage products under tight timelines across e-commerce, logistics, and content platforms (Hairluxe.ng, Bumasel.com, Udeliver.ng, BonReader.com; Kupon.ng - discontinued).
- Worked directly with founders and non-technical stakeholders to scope, prioritize, and ship features.

### Software Engineer (Frontend)

*Rexdreams (Part-time)*

Apr 2021 - Dec 2023

- Developed responsive, accessible web interfaces using modern JavaScript frameworks and component-based architecture.
- Integrated frontend applications with REST APIs and Firebase services.
- Optimized performance, cross-browser compatibility, and page load times.
- Worked in collaborative, fast-paced environments with changing requirements.

## EDUCATION

### B. Eng. (Computer Engineering)

*University of Benin, Nigeria.*

2016 - 2023

Graduated with Second Class Honours (Upper) with a CGPA of 4.31.

## SKILLS

- Languages & Frameworks:  
Javscript/Typescript, React Native, Flutter, Android (Java)
- Backend & Data: REST APIs, SQL (SQLite, SQL Server, PostgreSQL, MySQL), Backend Services
- DevOps & Tooling: Git/GitHub, CI/CD, AWS, Expo
- Animations: Framer, CSS, SVG

## NOTABLE PROJECTS

### BonReader - Full-Stack Engineer

2024 - 2025

- Online reading platform connecting authors and readers built end-to-end system including payments, wallet management, automated pay-outs, and content delivery.
- Implemented recommendation logic and real-time dashboards to support user engagement and platform analytics.
